SUMMARY

Product Manager committed to building products that users can operate easily and intuitively. Across a range of web and app projects, translated business requirements into user-centered product requirements, designed user flows and product policies, and collaborated with development and design teams to deliver products. Places high value on structuring complex requirements into executable directions and making product decisions that balance user experience with development realities.

PROJECTS

Creator Sponsorship Content Platform (Jan 2026 – Jun 2026)

- Planned and built the MVP of a creator-sponsorship-based content platform.
- Designed content registration, sponsorship, and access-permission policies based on the roles of creators and readers.
- Defined policies for one-time sponsorship-based content access, publication scope, and work management.
- Designed operational policies and business logic accounting for refunds, sanctions, and settlement exception cases.

Luxury Secondhand Furniture Marketplace Platform (Mar 2026 – Present)

- Planned a multi-sided marketplace service supporting sales, consignment, and rentals.
- Designed user flows and role-based access control (RBAC) policies across buyers, individual/business sellers, and administrators.
- Defined operational processes and business logic including seller/product approval and contract management.
- Specified the business logic of product catalog, ordering, and transaction features, and authored the functional specifications.
- Collaborated with development and design teams to support feature implementation and service delivery.

Hair Designer Booking Platform (Oct 2025 – Jul 2026)

- Planned a customer-hairstylist booking and matching platform for single-operator hair salons.
 - Designed a 1:1 matching structure based on a dedicated designer per customer, along with role-based permission policies.
 - Defined booking and rescheduling processes reflecting each designer's work schedule and available time slots.
 - Designed booking business logic incorporating double-booking policies and no-show handling.
-

COMPETENCIES

- **Product Management**
 - Product requirements definition (PRD)
 - User flow design
